---

A fully owned production value chain guarantees a high level of reliability. Hengkang exports to over 40 countries and enjoys an excellent reputation.

Our investments in the newest technology coupled with our facility expansion allow us to maximize efficiency and minimize costs, helping our customers to increase their competitiveness.

Our innovative R&D allows us to offer tailor-made products based on our customers' special requirements while ensuring to produce under the highest standards of quality.

# We Take Corporate Social Responsibility Seriously!

Environment-Friendly

As a leading manufacturer, Hengkang recognizes its impact on our world and the importance of leadership. Committed to building a sustainable economy, it distinguishes itself through environmentally responsible production. To achieve our sustainability goals, we constructed comprehensive environmental protection facilities.

A cyclist wearing a blue helmet and a yellow and black jersey is riding a road bike on a dark asphalt road that curves to the left. The road is bordered by a steep, mossy rock formation on the left and a grassy slope on the right. The sky is bright and clear.

# Main Products

- Creatine Anhydrous
- Creatine Gluconate
- Creatine Hydrochloride (HCL)
- Creatine Monohydrate
- Creatine Pyruvate
- Sarcosine Sodium

Adapted with leading processing technology and equipment, the company specializes in research and development of guanidine salt intermediate and nutrition additive. With our yearly production of 5000 tons of Creatine, Hengkang aims to become the global leader in Creatine specialization.

# Main Products

Hengkang's creatine is produced exclusively via chemical synthesis without any animal or plant ingredients. Our products are gluten- and fructose-free and have no allergens and are suitable for Vegans. We are certified with FSSC 22000, Kosher and Halal. More importantly, we operate under strict quality control, every single batch! The most advanced production lines from German manufacturers ensure constantly high quality.
